

## Modular Replenish Trolley

The Modular Replenish trolley enables trouble-free customisation for individual requirements. Its powder coating and stove enamelled finish makes the product not only impact and scratch resistant but gives them the robustness it needs for maintaining a long-service life.

It is used for either pick face replenishment tasks or general goods picking.

The shelves are all purpose and can therefore pick cases to crates, or place directly onto the shelf. This trolley can also be used for waste collection or other movements.

### Technical Specifications

Dimensions - (W/Stairs):	1300 x 600 x 1300(h) mm
Dimensions: - (W/out Stairs)	1060 x 600 x 1300(h) mm
